# DOMINOES

**A fun and easy game for the whole family to enjoy!**

## To start:

Put the Dominoes face down on the table and jiggle them up.

Each player takes 6 dominoes (no peaking yet!); for the game with more than 3 players, each player should draw 3 dominoes.

The remaining dominoes are left on the table (these are the "sleeping" dominoes). Don't let the other players see your dominoes.

The youngest player goes first (or if your name starts with a "B" for Bluestone, you can go first!).

## Let's play:

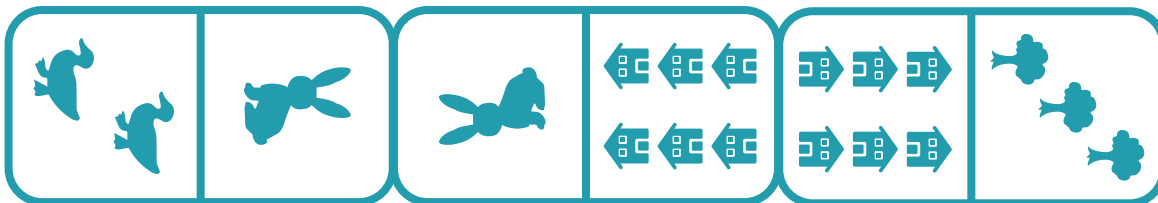

The Aim of the game is to use all of your dominoes up!

The first player places one of their dominoes (right side up) on the table.

The second player tries to put a domino on the table that matches one side of what is already there.

For instance, if the domino on the table has 2 Ducks and 1 Rabbit, and you have a domino with a side that can match this, then you put that side down next to the matching side of the domino already on the table.

it should look like this:

If a player cannot go, the player picks up a domino from the pile and then skips that turn.

The chain of the played dominoes develops very randomly, and can look a lot like a wiggly worm!

Continue taking turns putting dominoes on the board (or picking one from the pile if you cannot go) until someone wins.

## Winning:

The winner is the first person to get rid of all their dominoes. But if no one can go out, then the person with the fewest dominoes left is the winner!
